

Director  
Intelligence Community Staff

18 January 1982

NOTE FOR: Deputy Director of Central Intelligence

Bob:

Attached is a proposed re-do of the Goals and Objectives along the lines I indicated Tuesday. The logic behind the proposed changes is as follows:

1) A transmittal memo that will be read by addressees is required. It should put the Goals in context and relate this document to the Guidance. Having done that in a transmittal, much of pages 1 and 2 of the draft G&O is redundant.

2) To the extent possible, I believe the objectives should be stated as accomplishments of some sort rather than as mechanisms. The proposed rewrite tries to do that. The hardware and program implications are, in most cases, obvious from the objectives and will be covered in the program guidance document, together with other instructions on program submission.

With your concurrence, we will proceed along this path.
